ADMIRAL LEE: AND THE FIRST GLOBAL WAR (The Great Leaders: Their Struggle and Success Book 3) Young H. D. Kim

The years of hard research, field trip and all the works to complete this one book are dedicated to those honorable who sacrificed their lives to defend and build their country.

ADMIRAL LEE and his WORLD'S FIRST VOLLEY ARTILLERY FLEET will take you to a new world!

Not that many people realize that we live in the world our words create.

We all know the Korean War where the very first UN Peace Keeping Forces under General MacArthur's command fought hard to protect innocent people's lives from the North Korean invaders. But there were many other wars in Korea; we just don't name them the Korean War as if there's been only one war in Korean history.

It doesn't mean the two World Wars were the only world wars just because we named them so. We don't even think about the words we learn and speak, but just live within them as if those words are ultimate truth.

Not that many people know this either; the Japanese were defeated in the Western Pacific twice by the same strategy used by two different men.

More recently it happened during the 3rd Global Warfare, known as one of the World Wars in the early- to mid-20th century. And it also happened during the 1st Global Warfare in the late-16th to mid-17th century (You will find the clear reasons why it was the 1st Global War in your reading of this book).

The man of the 20th century, we all know his name. It is General Douglas MACARTHUR. But the man of the 16th century is relatively unknown to the world. His name was Admiral LEE Sunshin.

Unlike Gen. MacArthur, Admiral Lee was a man with a humble background. He was from a family that was marked as a national traitor by the government.

Even though he was born a noble, he could not get a proper job because of his family status. Most nobles were hired in the royal court even before they turned 18, but he had to start his very first career as a low-ranking officer in the forefront line at age 32. Yet, at the end, he became the national hero and one of the best models for success with great respect.

We will learn Adm. LEE's life, his brilliant military maneuvers and innovative weapons that thwarted the rising Japanese power, which Gen. MacArthur studied hard to fight the same enemy himself 3 and a half centuries later.

In the 20th century, the Japanese challenged the world super powers over the global hegemony. I believe it is worth knowing these daring people who've been dwelling in the small islands at the far-eastern corner of the world by learning who these people really are and where they came from.

What makes this book most distinctive from all other books about Admiral LEE and the Seven Years War (also called the Imjin War or the Great East Asian War) is the reason that made the Admiral so confident in his preparation for the incoming invasion upon his country while everyone called him an over-concerned-crazy budget sucker.

The world we live in today has become a place where everybody only cares about the result. But when we learn the cause and reason of the result, we really learn lessons to make better result for our future.

This book teaches us the cause and reason before the consequence that follows.
