The V-Bang: How The Universe Began

Mr. Josh Greenberger

The V-Bang: How The Universe Began Mr. Josh Greenberger

Where did all the matter in the universe come from? ----- Why is the universe expanding faster and faster? They say it's because of something called "dark energy." But is there really such a thing as dark energy? The V-Bang theory shows how there can't be, and how dark energy is not needed to explain the universe's increasing expansion rate. ----- Galaxies are spinning too fast for their size. Why aren't they flying apart? They say it's because of something called "dark matter." What if there's another explanation and dark matter doesn't exist? The V-Bang theory shows how. ----- Space is teeming with particles that pop in and out of existence. Where do they come from? ----- The V-Bang theory is the only treatise that answers all of the above in one comprehensive theory. ----- The big bang theory has a hard time answering some of the greatest mysteries in space. The V-Bang theory answers them with ease. ----- A new theory that describes the beginning of our universe has been long overdue. The V-Bang is that theory. You'll be amazed at how wrong the big bang theory has been and how the V-Bang theory answers with ease what the big bang cannot even begin to explain.
