The capacity to observe, interpret and understand human behaviour is vital for effective social work practice. By choosing to enter a profession that requires high levels of astute observation and listening skills in the interpretation of people's behaviour, social work students have undertaken a demanding task.

Using a bio-psychosocial framework, this fascinating book provides a wide basis of perspectives on human behaviour on which to build understanding of and responses to people's behaviours, along with an enhanced appreciation of some of the circumstances that shape behaviour.

Margarete Parrish covers the key theories of human growth and development in the context of social relationships, providing a frame of reference from which to explore various aspects of human behaviour. This is particularly relevant to students' preparedness to practice social work with complex populations, addressing factors such as:

- Attachment
- Developmental status
- Context
- Diversity

- Trauma
- Oppression

By drawing from biological, psychological and sociological perspectives, the book aims to provide social work students with a theoretically informed basis to observe, understand, and interpret people's behaviours in ways that will contribute to excellent practice.

The book includes exercises, discussion questions and chapter summary points to help the reader further develop their understanding.

*Social Work Perspectives on Human Behaviour* is key reading for all social work students.
