Osteology of the Reptiles

Alfred Sherwood Romer

Osteology of the Reptiles Alfred Sherwood Romer

Based on the work of Samuel Wendell Williston and Dr. W.K. Gregory, author and editor of the original title published in 1925, this volume consists of two major parts - a structure-by-structure account of the reptile skeleton, followed by a classification of the various reptile groups based on osteological characters. This update is designed to give, in outline form, an account of the nature of the skeletal system of numerous reptile types both living and extinct.
