One Day: Like Travis's Warp Speed, this new novel has a rapid-fire story action and suspense. At the same time, cutting-edge science is deftly incorporated into the story, in the tradition of Larry Niven, Robert A. Heinlein, James P. Hogan, and other masters of real science fiction. Tau Ceti: The riveting edge of your seat sequel to One Day On Mars once again takes us on a blindingly fast pace through events from a futuristic Washington D.C. to the Tau Ceti star system. Just days before the presidential election a CIA operative uncovers a plot to overthrow America that reaches deep into the government. To top it off, the forces planning to revolt have somehow developed a technology that allows them to transport across the gulf between the star systems almost instantaneously. Soldier: As another of Earth's colonies, Ross 128, secedes from the union, the President of the United States, former marine major Alexander Moore, takes swift action to prevent a second American Civil War, this time on an interstellar scale. He sends the flagship of the U.S. Naval fleet through the Quantum Membrane Teleporter based in the Oort Cloud to the seceding colony. But the Tau Ceti Separatists have stationed their own teleporter there and the flagship will be met with heavy resistance from the Separatist Navy.
