Drawing from her classroom experience, Laura Hall explains the communication and social and relationship issues faced by individuals with autism spectrum disorders and presents educators with best practices and programs for increasing academic achievement. In her newest book, the author guides educators in identifying, placing, and instructing students through real-life classroom and family cases. She includes strategies to determine the cause of ASD, a step-by-step guide for assessment, and evidence-based approaches to educate students through examination of the major theoretical perspectives?applied behavior analysis, developmental and social-relational, and the TEACCH approach. Furthermore, the text addresses: the use of evidence-based practices in the education of individuals with ASD mandated by the laws, IDEA 2004 and NCLB; approaches that take into account families from culturally and linguistically diverse backgrounds; applied behavior analysis; and working collaboratively with families and building communities of practice. This new and unique text will not only describe the most common practices implemented for learners with ASD, but will identify those that are evidence-based, and provide the best suggestions for future research in the field.
