## Putting the "I" in IHY: The United Nations Report for the International Heliophysical Year 2007 (Studies in Space Policy)

Putting the "I" in IHY This book is about international cooperation. It demonstrates how the power of scientific imagination and investigation can bring together people from all continents in almost all countries around the globe. In presenting this impressive result, we can understand, how much unifying force the quest for understanding our universe and using outer space for that purpose have. Astronomy is far away from being a "political" area of science. But it has enormous political effects – and all of these effects are positive. This book about the international aspects and achievements of the "International Heliophysical Year (IHY) 2007" can be regarded as a compendium of the fertile impacts of conducting research in this field. The main focus, as the title implicates, is the international cooperation, which has emerged from this grassroots initiative. North and South, industrialized and developing countries have been coordinating their efforts and have been learning from each other in a mutual partnership under a joint understanding of sharing the scientific benefits. Through this, trans-border networks have been created and scientific as well as cultural exchange took place.
