## **Coal and Coal-Related Compounds: Structures, Reactivity and Catalytic Reactions** T. Kabe

Coal is more abundant than petroleum and natural gas. Further, coal is not localized but can be used by many more countries than petroleum. Therefore, if we can establish coal utilization technology, coal will bring about a great contribution to human life and society. On the other hand, shortage of petroleum and natural gas are anticipated in the second half of the 21st century. To compensate, the use of coal is expected to gradually increase during the 21st century. In the future, the development of the coal utilization technology will become more and more important to insure the supply of liquid fuels for transportation and carbon sources for the manufacture of chemicals and plastic materials. In order to develop such technologies, the elucidation of the structure of coal is a fundamental area of study. Further, more efficient coal utilization technology must be established to meet environmental legislation. One of the key technologies for this purpose is catalysis. This volume provides detail of the basic and practical aspects of the science and technology of coal utilization with and without catalysts. The actual structure of coal, the chemistry included in the reactivity of coal, the methods to elucidate the structure of coal and re-action mechanisms of coal conversion, the most important catalyst for converting coal to liquid and gas, the role of the catalysts in coal conversion, the problems in the process engineering, and how to meet environmental regulations are discussed in detail. The recent progress in studies on the structure and reactivity of coal made over the last century is summarized and reviewed with emphasis on both fundamental and applied aspects of the science and technology for coal processing in the presence and absence of catalysts.

### **From reader reviews:**

#### **Cheryl Alexander:**

What do you consider book? It is just for students as they are still students or the idea for all people in the world, the particular best subject for that? Just simply you can be answered for that concern above. Every person has distinct personality and hobby for every other. Don't to be pushed someone or something that they don't desire do that. You must know how great and important the book Coal and Coal-Related Compounds: Structures, Reactivity and Catalytic Reactions. All type of book are you able to see on many resources. You can look for the internet solutions or other social media.

#### **Michael Johnson:**

Now a day people that Living in the era everywhere everything reachable by connect with the internet and the resources inside can be true or not involve people to be aware of each details they get. How individuals to be smart in getting any information nowadays? Of course the reply is reading a book. Studying a book can help men and women out of this uncertainty Information particularly this Coal and Coal-Related Compounds: Structures, Reactivity and Catalytic Reactions book because this book offers you rich data and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it as you know.

#### **Roger Cooper:**

Reading a book tends to be new life style in this era globalization. With reading through you can get a lot of information that will give you benefit in your life. With book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only the storyline that share in the ebooks. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write for their book. One of them is this Coal and Coal-Related Compounds: Structures, Reactivity and Catalytic Reactions.

#### **Shirley Drago:**

Within this era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you should do is just spending your time little but quite enough to experience a look at some books. One of the books in the top checklist in your reading list is usually Coal and Coal-Related Compounds: Structures, Reactivity and Catalytic Reactions. This book that is qualified as The Hungry Mountains can get you closer in turning out to be precious person. By looking upwards and review this reserve you can get many advantages.
