This RILEM AAR 1.2 Atlas is complementary to the petrographic method described in RILEM AAR 1.1. It is designed and intended to assist in the identification of alkali-reactive rock types in concrete aggregate by thin-section petrography. Additional issues include:

- optical thin-section petrography conforming to RILEM AAR 1.1 is considered the prime assessment method for aggregate materials, being effective regarding cost and time. Unequivocal identification of minerals in very-fine grained rock types may however require use of supplementary methods.
- the atlas adheres to internationally adopted schemes for rock classification and nomenclature, as recommended in AAR 1.1. Thus, rock types are classified as igneous, sedimentary or metamorphic based upon mineral content, microstructure and texture/fabric.
- in addition, the atlas identifies known alkali-reactive silica types in each rock type presented. It also identifies consistent coincidence between certain lithologies and silica types; however, it refrains from attributing alkali-reactivity to a specific silica property or quality.
- operator skill and experience remain essential for reliable assessment by thin-section petrography.
- aggregate materials must be classified according to local criteria, based on regional experiences with ASR-damaged field structures and geology. Access to additional data may be relevant for the assessment of imported materials.
- mere application of rock nomenclature does not provide any sort of warranty to the development of deleterious alkali-reaction. Such may result in either rejection of a suitable aggregate material, thus wasting a valuable resource, or acceptance of an unsuitable material leading to concrete damage, both of which are undesirable.

From reader reviews:

Marjorie Batchelder:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each guide has different aim as well as goal; it means that book has different type. Some people experience enjoy to spend their time for you to read a book. They can be reading whatever they take because their hobby is reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book when they found difficult problem or perhaps exercise. Well, probably you'll have this Petrographic Atlas: Characterisation of Aggregates Regarding Potential Reactivity to Alkalis: RILEM TC 219-ACS Recommended Guidance AAR-1.2, for Use ... Method (Rilem State-Of-The-Art Reports).

Lorenza Jones:

The reason? Because this Petrographic Atlas: Characterisation of Aggregates Regarding Potential Reactivity to Alkalis: RILEM TC 219-ACS Recommended Guidance AAR-1.2, for Use ... Method (Rilem State-Of-The-Art Reports) is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will jolt you with the secret it inside. Reading this book beside it was fantastic author who else write the book in such amazing way makes the content on the inside easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of advantages than the other book have got such as help improving your proficiency and your critical thinking means. So , still want to hold off having that book? If I were being you I will go to the e-book store hurriedly.

Carolyn Wilson:

The book untitled Petrographic Atlas: Characterisation of Aggregates Regarding Potential Reactivity to Alkalis: RILEM TC 219-ACS Recommended Guidance AAR-1.2, for Use ... Method (Rilem State-Of-The-Art Reports) contain a lot of information on that. The writer explains the girl idea with easy method. The language is very straightforward all the people, so do not worry, you can easy to read this. The book was authored by famous author. The author will bring you in the new age of literary works. You can easily read this book because you can please read on your smart phone, or device, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site in addition to order it. Have a nice go through.

Lucille Yang:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person similar to reading or as studying become their hobby. You should know that reading

is very important and book as to be the issue. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Petrographic Atlas: Characterisation of Aggregates Regarding Potential Reactivity to Alkalis: RILEM TC 219-ACS Recommended Guidance AAR-1.2, for Use ...
