These studies explore significance and integrity of the cultural landscape and will guide the park in future rehabilitation efforts. This report is a combination of original research and synthesis of previous research and management documents. Long-term park staff members have guided the project, and the park's extensive archival collection has been tapped. The narrative landscape summary, synthesized from the archive's collection of documents, photographs, and plans, is the heart of this report. The following report, Part 1 of the CLR, presents a chronological site history of the property and its existing conditions in 2002 with both narrative text and illustrations. The Landscape Analysis chapter evaluates the significance and integrity using the terms and definitions of the National Register of Historic Places program.
